

WizCRM – Product features

WizCRM is a lead-lifecycle CRM for sales and field teams, from Wise & Agile Solutions Ltd. It tracks every prospect from first contact through qualification, proposals, and win/loss—on **web** and **mobile**—with optional proof-of-visit and ERP sync for growing businesses.

Use this list for brochures, websites, and sales sheets. Technical detail: [SRS.md](#).

Core CRM

Feature	Description
Lead management	Create and maintain leads with contact details, company, source, owner, tags, and custom fields.
Lead search and filters	Find leads quickly by name, company, stage, owner, source, dates, and stale status.
Lead detail view	Single screen for full record, current stage, next action, and activity history.
Duplicate detection	Warns when a new lead matches an existing email or phone number to keep data clean.
Assignment and handoff	Assign or reassign leads to sales reps or teams with a clear ownership history.
Audit trail	Records who changed what on leads, stages, and settings for accountability.

Lead lifecycle and pipeline

Feature	Description
Lifecycle stages	Structured path: New → Contacted → Qualified → Proposal → Negotiation → Won or Lost.
Visual pipeline	Kanban or list views grouped by stage so managers see funnel health at a glance.
Stage history	Every stage change is logged with user, time, and optional note—nothing happens in silence.
Close as Won	Mark deals won with value, start date, and products or services; ready for handoff to accounts.
Close as Lost	Close lost deals with structured reasons (price, timing, competitor, fit, etc.) for analytics.
Reopen leads	Return a lost lead to an earlier stage when opportunity returns, with full audit.
Stale lead alerts	Highlights leads with no recent activity so reps follow up before opportunities go cold.
Configurable stages	Admins can tailor stage names and workflow to match how your business sells.

Activities and timeline

Feature	Description
Unified timeline	One chronological feed per lead: calls, emails, meetings, tasks, notes, and system events.
Call logging	Log calls with outcome, duration, and notes—manual or prompted after a phone call on mobile.
Email logging	Record email touchpoints with subject, summary, and direction (inbound/outbound).
Meetings	Schedule meetings linked to leads, with location, time, and attendees.

Tasks and Feature reminders	Description
	Set follow-ups with due dates; get notified so nothing slips through the cracks.
Internal notes	Private notes on leads for team context without exposing them to the customer.
Next action	Optional “what’s next” and date on each lead, surfaced on dashboards and lists.

Field sales (mobile-first)

Feature	Description
Mobile app (iOS & Android)	Full CRM access on the road via a native mobile experience built with modern cross-platform technology.
Post-call lead prompt	After a sales call ends, the app prompts you to attach the call to the right lead and log outcome in seconds.
Tap-to-call and email	Start a call or email from the lead record without copying numbers or addresses.
Add leads on the go	Capture new prospects immediately after events, visits, or calls.
Push notifications	Alerts for due tasks, new assignments, and important lead updates.
Offline-friendly mobile	Recently viewed leads and drafts available when signal is weak; sync when back online.
Compact mobile pipeline	Review and update pipeline stages from a phone-optimized layout.

Meeting location and attendance

Feature	Description
Meeting destination on map	Set meeting location by address or map pin before the visit.
Navigate to meeting	Open turn-by-turn directions in Google Maps or Apple Maps from the app.
Geofence check-in	Automatic arrival time when the rep enters a radius around the meeting site.
Geofence check-out	Automatic departure time when the rep leaves the area—on-site duration calculated.
Attendance status	On-time, late, no-show, or partial visit based on scheduled vs actual times.
Manager override	Managers can correct arrival or departure with reason when GPS or edge cases require it.
Meeting attendance reports	See who attended which meetings and for how long—ideal for field team oversight.

Quotations and ERP integration

Feature	Description
Quotations in WizCRM	Build quotes with line items, quantities, prices, discounts, and tax linked to the lead.
Sync quotes to ERP	Push approved quotations into your accounting or ERP system as draft quotes or sales documents.
Customer sync with ERP	Keep clients aligned between WizCRM and ERP—create or update customers in either direction per your rules.
	Integration framework for SAGE Evolution 200 , SAP Business One , QuickBooks , and Tally (enabled per

Supported ERP platforms Feature	Description
Field mapping	Configure how names, addresses, tax IDs, and other fields map between WizCRM and each ERP.
Scheduled and manual sync	Automatic sync on a schedule plus on-demand sync for admins.
Sync audit log	Full history of what synced, when, and whether it succeeded—for support and compliance.
ERP product catalog (optional)	Pull item lists and prices from ERP for faster, accurate quote lines.

Dashboards and reporting

Feature	Description
Personal dashboard	Your open leads, tasks due today, stale leads, and upcoming meetings in one place.
Manager dashboard	Team pipeline snapshot, attendance exceptions, and unlinked calls for coaching.
Conversion analytics	See conversion rates by stage, source, owner, and time period.
Time in stage	Identify bottlenecks by measuring how long leads stay in each stage.
Win/loss analysis	Understand why deals are won or lost with reason breakdowns.
Export to CSV	Export leads and activities for spreadsheets and external reporting.
Saved views	Save favorite filters (e.g. “My qualified leads this month”) for one-click access.

Web administration and bulk tools

Feature	Description
Bulk import	Import leads from CSV for campaigns, events, or migrations.
Bulk updates	Mass assign owners or move stages for manager efficiency.
User and team management	Invite users, define teams, and control who sees what.
Sources and loss reasons	Configure lead sources and lost-deal reason lists to match your business.
Custom fields	Add industry-specific fields without code changes.
System settings	Defaults for stale days, geofence size, call prompts, and org-wide behaviour.

Multi-tenant SaaS platform

Feature	Description
Cloud multi-tenant	One WizCRM platform serves many customer organizations with strict data separation.
Organization workspaces	Each client company has its own leads, users, settings, and branding.
Subdomain or tenant login	Users access their organization’s workspace securely (e.g. by company subdomain).

Feature	Description
Per-organization branding	Logos and colours so each tenant's team sees their identity.
Roles per organization	Sales, Manager, and Admin permissions scoped to each tenant.
Multi-organization users	Consultants or admins can switch between organizations they belong to.
Seat-based licensing	User invites respect licensed seat limits from your subscription plan.
Data export and offboarding	Tenant admins can export their data; platform supports deletion workflows.

Commercial licensing (ScaleGate)

Feature	Description
ScaleGate license integration	Subscriptions and entitlements managed in ScaleGate ; WizCRM enforces access from your commercial system.
Plan-based features	Unlock geofence, ERP sync, call prompts, and more based on the customer's plan.
License status in app	Admins see plan name, renewal date, and link to manage subscription.
Graceful renewal handling	Grace period and read-only mode when a license expires or payment lapses.

Integrations and automation

Feature	Description
Web lead capture	Incoming web forms can create leads in WizCRM automatically.
Calendar sync (planned)	Connect Google or Microsoft calendar for meetings and tasks.
Email integration (planned)	Optional sync with mailbox for richer email history.
Webhooks	Notify external systems when leads or stages change.
Automation rules	Auto-assign by source, reminders for stale leads, and similar workflow helpers.
Slack / Teams alerts (planned)	Team notifications for new leads, wins, or exceptions.

Post-sale and accounts

Feature	Description
Convert to customer account	Turn a won lead into a customer record for post-sale relationship management.
Account timeline	Continue logging activities after the sale for renewals and support handoff.
Renewal and upsell tracking	Track expansion opportunities on existing customers.

Security, privacy, and compliance

Feature	Description
Secure sign-in	Industry-standard authentication; optional SSO and two-factor for enterprise plans.
Encrypted credentials	ERP and integration passwords stored securely, never exposed in the app.
GDPR-ready tooling	Export and delete contact data to support privacy requests.
Location transparency	Clear consent and policies when meeting geofence features are used.

Optional enhancements (roadmap)

Premium or future capabilities that can differentiate higher tiers or later releases:

Feature	Description
Dark and light themes	Comfortable viewing in any environment.
Customizable home screen	Arrange widgets for tasks, pipeline, and priorities.
Pinned leads and recent search	Faster access to what you work on most.
Team chat on a lead	Internal discussion thread per opportunity.
@mentions in notes	Notify colleagues from within a note.
Document attachments	Store proposals, contracts, and photos on the lead.
Document templates	Generate proposals from lead data automatically.
E-signature	Connect to DocuSign or similar to close faster.
Business card scan	Create leads from a photographed business card.
Email templates	Merge lead fields into consistent outbound emails.
AI timeline summary	Short summary of recent activity on a lead.
AI suggested next action	Smart recommendations for what to do next.
Lead scoring	Prioritize leads by fit and engagement.
Snooze lead	Hide a lead until a future date.
Report builder	Custom charts and tables for power users.
Quotas and forecasts	Targets per rep and weighted pipeline forecast.
Leaderboards and badges	Optional gamification for motivated teams.
Home screen widget	Tasks due today on the phone home screen.
Biometric app unlock	Fingerprint or face unlock on mobile.
Arrival photo	Optional photo proof when checking in at a meeting site.

Platforms

Platform	Description
Web application	Full CRM, administration, reporting, and ERP configuration in the browser.
Mobile application	Android and iOS apps for field sales, calls, meetings, and geofence attendance.

Wise & Agile Solutions Ltd

WizCRM is designed for teams that need **visibility across the full lead lifecycle, proof of field activity, and alignment with accounting systems**—without juggling spreadsheets and disconnected tools.

For implementation status, see [PROGRESS_TRACKER.md](#). For technical requirements, see [SRS.md](#).
